

**Destiny RIC** is the latest introduction from Starkey to bring you a device that offers the convenience, comfort, and discretion of a receiver-in-the-canal, plus the performance of nFusion Technology. This landmark device brings together Starkey's breakthrough nFusion Technology with today's popular receiver-in-the-canal (RIC) design. Destiny RIC places the receiver directly in the ear canal, enhancing both comfort and sound quality. Packed with the power of nFusion Technology, Destiny RIC is the industry's most sophisticated receiver-in-the-canal device. An ultra comfortable, lightweight instrument that seamlessly adapts in even the noisiest environment, so new users may even forget they're wearing Destiny RIC.

Destiny RIC in addition to breakthrough nFusion Technology, the Destiny RIC offers:

- Two case options-Directional (with a size 312 battery) and omnidirectional (with a size10 battery) to give you more ways to customize and meet your listening needs.
- An ultra-discreet case in three natural colors designed to be both sophisticated and inconspicuous.
- An assortment of thin tubing lengths and shapes, to ensure proper sizing for every patient's ear.
- New "propellers" that provide a secure fit and comfort in a range of sizes.
- An option of floating receivers without "propellers" for a no-touch feel.
- A retention lock engineered to keep the hearing aid in place even for very active patients.

### **Destiny Open Family**

With the release of the Destiny RIC, Starkey provides you with the hearing care industry's broadest range of open-fit solutions.

**Destiny OTE-** Our on-the-ear model is light, attractive, easy-to-fit, and offers superior sound and comfort.

**Destiny BTE-** Our behind-the-ear offers unprecedented gain, along with thin, transparent tubing, and the same soft, comfortable, earbuds as the Destiny OTE.

**Destiny CIC-** Only our completely-in-the-canal is available with a unique, large vent to reduce occlusion and provide natural sound in a custom hearing instrument.
