

Introducing Starkey's S Series Hearing Aids

The Place for Better Hearing is pleased to introduce Starkey's new S Series hearing aids. These hearing aids are more powerful and precise than ever before. If you've been waiting for a hearing aid that provides performance, comfort, and personalization, S Series is the hearing aid for you.

The S Series with Drive Architecture offers a complete line of hearing aids designed to suit your unique lifestyle and hearing needs. S Series hearing aids come in a range of styles and colors designed to match your hair color or skin tone. There are Receiver-In-the-Canal (RIC) aids, In-The-Ear (ITE) hearing aids, Canal style aids, and the almost invisible Completely-In-the-Canal (CIC) style aids. Every hearing aid in the S Series family has been designed to perform in the most challenging listening situations. Drive Architecture is Starkey's newest integrated system for maximizing comfort in noise and preserving speech understanding. Drive Architecture allows S Series to deliver maximum everything:

PERFORMANCE

Three times more powerful with multi-core technology for virtually no whistling, better hearing in noise, and better telephone compatibility.

COMFORT

Comfortable, high-resolution sound with smoother, seamless transitions between quiet and loud environments. S Series automatically adjusts to situations for you.

PERSONALIZATION

Our individualized hearing and lifestyle assessment ensures that your hearing aids match your exact hearing loss and listening needs.

The audiologists at The Place for Better Hearing will assist you in choosing the S Series device that is right for you. All S Series models offer a patented feedback eliminator. The most common complaint from hearing aid wearers is the annoying whistling referred to as “feedback.” S Series’ PureWave Feedback Eliminator solves this problem and is proven to be the best feedback management system in the industry.

Let us be the first to introduce you to S Series by Starkey. Come in and test drive a super computer for your ear, all in a high-tech, comfortable design that’s barely visible when worn. S Series by Starkey is the next generation of hearing aids available at The Place for Better Hearing. **For better hearing in a size and shape that meets your needs, call 922-0123.**
