

Welcome to our practice!

At The Place for Better Hearing, we offer complete hearing services for diagnosing and treating hearing loss for persons of all ages. Our mission is to improve the quality of life for persons with hearing loss. We strive to provide the best possible care in the areas of identifying hearing loss, fitting patients with the best quality digital hearing aids, preventing hearing loss with hearing protection, providing education and counseling about hearing health, and offering a variety of assistive listening devices.

The average life for a hearing aid is about 5 years. Taking good care of your hearing aids will help ensure a longer life. It is important to have your hearing aids cleaned and checked periodically. At The Place for Better Hearing we offer hearing aid clean and checks daily on any brand of hearing aids. Call us or stop by to have your hearing aids inspected!

If you are considering new hearing aids, we sell Starkey hearing aids. Our success with Starkey has been exceptional! The newest product on the market, Destiny, is the only hearing instrument built with cutting-edge technology offering superior sound and virtually no feedback. Imagine being able to hug a loved one with no annoying whistling! All Destiny products have a state-of-the-art sound management system that automatically detects and classifies different sound environments, then adjusts automatically. You can move from a crowded restaurant to home, without ever making an adjustment on the hearing aid.

If hearing aids are recommended, one of our audiologists can help you choose the best hearing aid for you. Your hearing loss, lifestyle, communication needs, and manual dexterity will all be factors to consider when deciding which hearing aids will work best for you.

As you consider the various options that influence your decision, don't put off better hearing any longer because of cost. We offer "Care Credit," a payment program to help make hearing aids affordable. You can finance a portion of the cost of hearing aids or the full amount. A popular payment plan is for 12 months; this plan has no interest charge as long as the financed amount is paid by the end of the 12 month finance period.

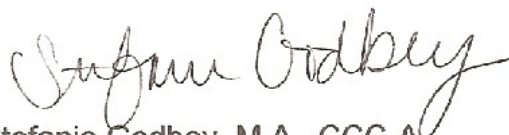

Please call (513) 922-0123 and schedule an appointment with questions you may have about your existing hearing aids or purchasing new ones. We are located at 3302 Westbourne Drive, Cincinnati, OH 45248. We are open Monday-Friday from 9am to 5pm. Evening appointments can be made by request and we are open one Saturday a month.

We are looking forward to meeting and working with you!

Best Regards,

Laurie DeWine, Au.D., CCC-A
Doctor of Audiology

Stefanie Godbey, M.A., CCC-A
Audiologist
